

# Tetris Final Project

Mid Report Goal: Draw all 7 tetrominos

"I" or "straight":

"O" or "square":

"T":

"S"

inverse  
"skew or right snake"?

"2" "skew or left snake":

Red

"J" "inverted L or left gun":

Blue

"L" "right gun":

Orange

### Triangle Strip Implementation

"0"

or

or

// 2x Tall and wide  
same

"T"

## Triangle Strip Book Notes:

### "I" Tetromino Implementation

9 points?

### "O"

// Should be able to just draw as  
a square, just make sure its 2x  
width and height

?

### "T"

// Color for each object // Two Draw Calls in the class  
// zero width

// Circle and Square at start at different  
points

### "S"

// Might need to pass transform matrix in constructor

Or maybe I should be using  
GL\_Quad-Strip

Quad Strip

// Must code in that order

"5"

that unit should be each  
"box" is 1x1

L Rotation:
